

### OUR PROMISE

To tenaciously research and develop environmentally sustainable solutions that help continuously and persistently protect life's surfaces. We will continue to reinvent new standards of clean through advancements in technology.

*Persistent | Continuous | Clean*

# The **BIOPROTECTUs™** System

## SETTING NEW STANDARDS for CLEAN

Application of the **BIOPROTECTUs™ System** of products, when used in a 2-step system includes:

- 1 SMARTTOUCH™**  
For Disinfectant
- 2 BIOPROTECT™**  
For Antimicrobial Protection

**SmartTouch™** Disinfectant is an EPA registered hospital grade cleaner. Utilizing a unique chemical formulation that includes natural elements, SmartTouch Disinfectant spreads and penetrates both hard and porous surfaces. Ready to use, shown to eliminate more than 30 organisms including superbugs like MRSA and H1N1. With no harmful by products, just spray, or fog directly from the bottle. It is non-irritating to the skin and non-corrosive to surfaces.

#### **EPA Registered Hospital Disinfectant**

Proven to kill a wide range of viruses and bacteria SmartTouch Sanitizing Disinfectant won't contribute to the formation of mutating "super bugs" and does not contain volatile organic compounds (VOC's).

#### **Food Contact Sanitizer–No Rinse Required NSF Registered (D2) Sanitizer**

99.999% Sanitization on food contact surfaces. SmartTouch Sanitizing Disinfectant is odorless and won't alter the taste of food on sanitized surfaces. SmartTouch kills 99.999% of bacteria including eColi, Salmonella and Listeria in less than 60 seconds.

#### **Mold & Mildew Killer**

Kills Mold and Mold spores. Safe on a wide range of porous non-porous.

#### **Allergen Eliminator**

Proven effective on pet dander as well as dustmite and cockroach allergens. Can be used directly on pet bedding & sleeping areas.

#### **Odor Eliminator**

End odors caused by bacteria, mold, mildew, pet urine and more. SmartTouch Sanitizing Disinfectant contains no masking agents or fragrances and is highly effective at destroying odor.

**BIOPROTECT™** is an EPA registered, water-based, antimicrobial technology that provides persistent and continuous protection. BIOPROTECT is a preservative antimicrobial coating that can be applied to both porous and non-porous surfaces to inhibit the growth of odor causing, and stain causing bacteria.

BIOPROTECT's patented antimicrobial technology uses self assembling monolayers to create a field of nanospikes that mechanically kill microbes (bacteria, molds, viruses) by piercing and rupturing their cell membrane. This kill method prevents microbes from mutating and adapting inhibiting the ability for superbugs to grow.

**Bound Technology** – unlike conventional disinfectants, poisons, phenols or heavy metals, our technology performs while bound to the applied surface (substrate).

**Residual Efficacy** – Unlike other antimicrobials, our product's efficacy remains active on surfaces for up to 90 days

**Large Spectrum Efficacy** – Effective against mold, mildew, algae, fungus and viruses

**Unmatched Versatility** – Can be applied on almost any surface (both porous and non-porous).

**Water Based Formula** – BIOPROTECT is a completely water-based formulation. It is easily used by field personnel using a basic spray bottle, or a high fogging system.

**Unrivaled Safety Profile** – BIOPROTECT uses ZERO Triclosan, heavy metals, arsenic, titanium, phenols or poisons.
